

## **BioPure™ Chlorella Pyrenoidosa**

*BioPure uses a patented process by which stiff structural elements of the cell wall are cracked using sound waves. This keeps the extra cellular chlorella barrier intact, thus protecting all of the cell's organelles. It has a better absorption of toxins, but is harder to digest than some other forms of Chlorella.*

**Healing Benefits:** Chlorella has multiple health inducing effects. Listed below are some of the known effects.

- \* **Antiviral** (especially effective against the cytomegaly virus and herpes)
- \* **Toxin binding** (mucopolysaccharide membrane) for all known toxic metals, environmental toxins, such as dioxin, and others
- \* Repairs and activates the body's detoxification functions \* Dramatically increases reduced glutathion
- \* Various chlorella peptides restore coeruloplasmin and metallothioneine
- \* Methyl-cobalamin is food for the nervous system. It restores damaged neurons and has its own detoxifying effect.
- \* The porphyrins in chlorophyll have their own strong metal binding effect. Chlorophyll also activates the PPAR-receptor on the nucleus of the cell.
- \* **Super nutrient:** with 50-60% amino acid content it is an ideal nutrient for vegetarians. Methyl-cobalamin - the most easily absorbed and utilized form of B 12, B6, minerals, chlorophyll, beta-carotene etc.
- \* **Immune system strengthening**
- \* **Restores bowel flora**
- \* **Digestive aid** (bulking agent)
- \* **Alkalinizing agent** (important for patients with malignancies)

**Adult maintenance dosage:** 1 gram (approximately 4 tablets) 3-4 times per day Chlorella must be taken 30 minutes before the main meals and at bedtime.
